

# UNIFLEX

## RADIUS SHELVING

Uniflex Radius shelving is an exciting new curved shelving based upon the Uniflex Shelving system, which has been the standard of excellence worldwide. Separately, or in conjunction with a whole Uniflex system, this product is designed with flexibility, quality, options and features, and durability.

The sturdy shelving system with 30 x 30 mm perforated square tubing is ideally suited for use in high volume libraries as well as in public and school libraries. The design of the shelving systems with 25 mm increments allows for easy assembly and adjustment without use of specific tools.

The Uniflex Radius shelves, which come double sided with a radius of 22.5 degrees, are constructed of a wood core, with plastic laminate or veneer finish. Standard Heights available are 43", and 60". Casters for either hard floors or carpet are available as an option.
