INFORM TABLES

WWW.BCILIBRARIES.COM

There was a day when a table was a table, and most looked the same. Today, we function differently and so should the horizontal surfaces we work, collaborate, sip coffee and use devices at. The INFORM series of tables utilize a clean monolithic design with matching top and sides. Sizes, heights, and even shapes can be varied. High versions are great for standing (recommended by doctors everywhere) or utilizing cool stools like the "Popcorn". While stylish and elegant on its own, the series is a great match with INFORM counters, Inform Curved Shelving", and Ratio Shelving. Options for power and device charging, data and cable management complete the picture.

Accessories - Have your desks fabricated just like you want them!

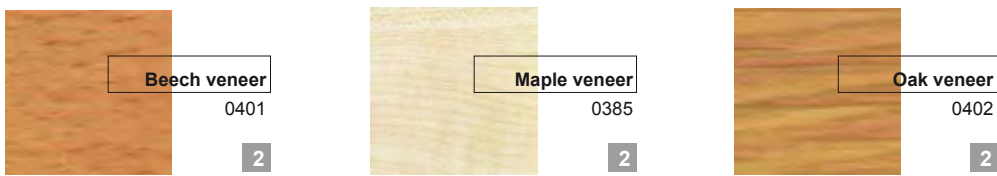

Surfaces

from solid wood veneer and plastic

Wooden surfaces are either directly plastic-coated or covered with an HPL laminated plastic, depending on their application. Differences in colour underline the characteristics of solid wood surfaces and cannot be avoided. Solid wood changes its colours under the influence of light. Table and work surfaces with solid wood veneer have only limited abrasion resistance. We recommend our highly resistant plastic decors for these types of surfaces. We use environmental-friendly lacquers for our solid wood surfaces.

DESIGN OPTIONS

Other surfaces and veneers upon request.
